

WALL HYDRANT MADE EASY™

Residential Wall Hydrant Casing System

APPLICATION

The Wall Hydrant Made Easy™ (WHME) allows residential frost-free wall hydrants to be replaced quickly and easily without entering a crawlspace or tearing into interior walls or ceilings, greatly reducing the time, labor, and expense traditionally associated with replacement or repair. The WHME also protects the building from flooding and water damage in the event that the hydrant should rupture and leak. The WHME is designed to accept most brands of ½" MIP, residential frost-free wall hydrants and is available in any length.

FEATURES

- Fits most brands of 1/2" MIP hydrants of any length (i.e. 4" up to 24").
- Adjustable mounting base allowing for up to 1" of variance between different hydrant brands of the same nominal length
- Slotted screw holes allowing for mounting of various hydrant brands
- ½" FIP piping connection
- Fully sealed sleeve to direct hydrant leaks away from the building
- Mounting base angled to facilitate hydrant drainage
- Available with or without a premium hydrant preinstalled
- Size stamped on underside to simplify future hydrant replacement

MATERIALS

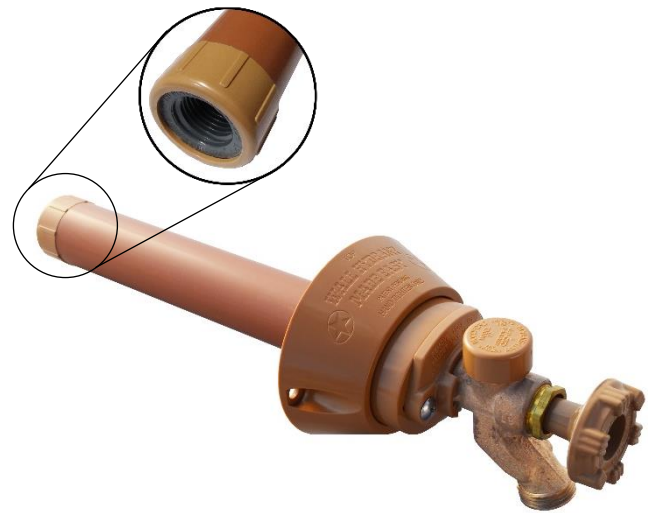

- Mounting base UV-resistant ABS
- Sleeve/tube PVC
- Piping connection PVC
- Flange screws 18-8 stainless steel

COLOR

- Available in tan, grey, or green

HOW TO ORDER

- Full product offering available at mitimfg.com.
